Cleaner SAVAN® 210 for EDM - machines

	<ul style="list-style-type: none">■ highly effective cleaner on an acid basis■ releases the oxide layer in a short amount of time therefore there is no need for blasting.■ non-toxic, does not contain Aldehyde/ Phenole, free from dioxin containing substances.■ non health- or environmentally harmful substances.■ 100% biodegradable.■ easily washable.■ Skin friendly, use of gloves not necessary. <p>SAVAN® 210 is a highly effective odorless product specifically for cleaning wirecut EDM machines. The wide range of efficiency allows the cleaning of dielectric tank, machine guides, clamping tools, accessories, as well as metal and ceramic surface,</p>
---	---

■ Application

Apply diluted or undiluted with a paint brush or rag. Allow to soak for few minutes. Afterwards wipe off with a clean rag and rinse with water. Do not allow cleaner residues to contaminate dielectric.

■ Cleaner Savan® 210

Savan® 210 is a very effective Cleaner. Due to exact chemical formulation, it is harmless to the machines. It is a universal cleaner for die wire cut- and sinking erosion machines. With Savan® 210, you can quickly and efficiently clean the work tank, parts and diamond guides. The cleaning time is very short, approximately 1-2 minutes. Given that many materials are differently alloyed, it is difficult for us to estimate a precise amount of time until the product is effective. The client has to find the correct time by themselves. Afterwards the parts should be washed with soap water. It is not recommended to leave the parts for too long in the cleaner, otherwise it will extract the carbon out of the material and a dark layer could form.

The distinctive characteristic of Savan® 210 is that it has high skin protective values, which was realized through systematic selection of a cosmetic additive.

■ Therefore, it is not necessary to wear gloves when working with Savan® 210 .

■ Availability: Plastic bottles 3lt / 5 lt / 10lt / 25 lt and drums à 200 liters

Savan Chemie AG, located in Stäfa/Zurich produces chemical consumables predominantly for EDM machines. SAVAN® products have established themselves as excellent products and have consistently been adjusted for new machines.
